# Contents

<b>1</b>	<b>Introduction</b>	<b>5</b>
<b>2</b>	<b>Example chapter</b>	<b>7</b>
2.1	This is my test chapter . . . . .	7
2.2	Another second level . . . . .	7
<b>3</b>	<b>Test with R embedded code</b>	<b>9</b>
3.1	R Markdown . . . . .	9
3.2	Including Plots . . . . .	9

# Chapter 1

## Introduction

This is repo is just me running through the steps of Alex Lalejini's guide:  
<https://lalejini.com/2021/01/09/bookdown-autodeploy.html> !

## Chapter 2

### Example chapter

#### 2.1 This is my test chapter

##### 2.1.1 Three levels deep

#### 2.2 Another second level

Test! :^)

## Chapter 3

# Test with R embedded code

### 3.1 R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   : 2.00
## 1st Qu.:12.0    1st Qu.: 26.00
## Median :15.0    Median : 36.00
## Mean   :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
## Max.   :25.0    Max.   :120.00
```

### 3.2 Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
